

#### **§14. Renting/leasing for the purpose of breeding**

Renting (or renting out) a bitch for the purpose of breeding is an exception and requires the prior consent of the Breed Warden of the Landesgruppe. The application for rental breeding must be approved at least four weeks before the mating date by KIM-D Breed Warden on the form (breeding agreement) provided by the KIM-D club. The approved breeding contract is part of the registration documents and must be attached to the application for litter registration.

The bitch should be in custody of the renter from the mating day up to the day of litter inspection. Puppies from rental breeding circumstances must be registered under the kennel name of the renter.

The fulfilment of the obligations arising from the contract are the responsibility of the renter. Females, which are in the ownership or possession of persons who are banned from the breed book, may not be used for rental breeding. Rental breeding beyond German national borders, requires prior approval of the Breed Commission.
